MICRO-STONE

Imagine

Built as Nature Intended

Bomanite Micro-Stone™ transforms existing or worn interior or exterior concrete into an architectural stone surface with a unique natural appearance – because it largely is. This engineered topping is comprised primarily from a range of select aggregates including silica, mica, feldspars, and granite along with a small content of hard ceramics and recycled glass. Bound with UV stable zero VOC resins and containing no pigments or Portland cement, Bomanite Micro-Stone is an environmentally friendly alternative to traditional cementitious toppings. Available in a range of blends and patterns using decorative saw cuts or stenciled graphics, Bomanite Micro-Stone is an effective choice for renovation projects or new construction requiring consistent results over multiple pours.

TOPPINGS SYSTEMS

MICRO-STONE

REALIZE The Possibilities.

Functionality with Style

The Bomanite Micro-Stone system utilizes a selection of primers that are bonded to the surface of cured concrete or correctly prepared wood substrates. Applied on average at 1/8" thickness, Bomanite Micro-Stone requires no elevation changes to the substrate. Once cured, the Bomanite Micro-Stone is decoratively cut and detailed, then sealed or coated with one of Bomanite's water-based sealers or high-performance coatings. The primary benefits to Bomanite Micro-Stone are the range of unique blends, the aggregate characteristics, no fading, and the ability to transform ordinary concrete into a completely refreshed surface.

Aggregates, Aggregates, Aggregates

Bomanite Micro-Stone is aggregates. Bound together to create limestone or granite type looking surfaces. Shades of tans, blacks, browns, grays, and white along with specialty reflective or even organic aggregates (interior applications only) such as walnut shells, straw, and wood. Highly abrasion resistant to foot traffic and light vehicular traffic like residential driveways and garage floors, Bomanite Micro-Stone is also slip resistant under foot meeting all co-efficient of friction and traction requirements.

Insist on only the best. Insist on Bomanite Toppings Systems.

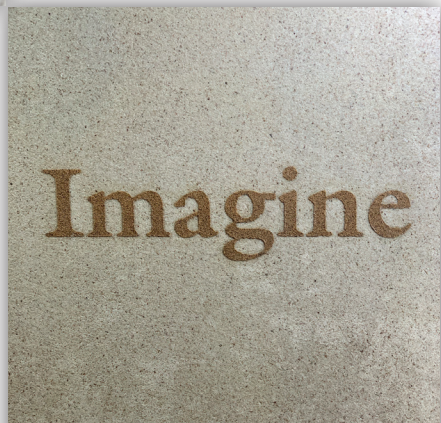

When you choose a Bomanite Toppings System rest assured that the application will be handled by a highly skilled and specially trained licensed Bomanite Contractor who will work with you to create unsurpassed, high-quality concrete flooring systems.
